

RIMCO resources

...have a product idea, let's bring it to life!

Look to Rimco Resources

for all your product development needs. From concept to production, Rimco can help take your product to market with our wealth of product development services. We offer:

*concept sketches • product design • usability studies • software storyboarding
3D CAD • engineering and prototyping • tooling
sourcing • mass production • logistics*

Focus on getting your product to market, not on finding more capital. Our low cost development system will help you focus on getting your product to market, not on finding additional capital. We do this through frequent technical reviews, and with several long-term manufacturing partners. We will communicate with all disciplines necessary for good product management - saving you time and money.

product development and manufacturing consultants

Rely on our knowledge to get the job done.

Rimco Resources has been around for several decades and offers experience in designing and developing products for inventors, professionals and corporations.

*pet products • home & garden • non-profit • lighting
personal comfort • medical • consumer electronics*

We know product development and manufacturing inside and out. And we can help you create a relevant and manufacturable product, utilizing appropriate technology to get your product to market quickly.
